

Full Stack Web Developer (f / m / d)

Pessl Instruments aims to reshape agricultural practices that will have a positive impact on everyone involved – from farmers to consumers. With technologically advanced agriculture hardware & software solutions, we help farmers all around the globe make their farming profitable, efficient and sustainable. Ever since our **establishment in 1984**, the thought about sustainability is one of our keystones when it comes to the development of METOS® products and solutions. With the Green New Deal, we are even more determined to continue in the direction we set out at the very beginning - help the farmers achieve the best yield, without compromising the environment.

Do you want to be a part of this international team in a well-established and fast growing company in the field of IoT for Agriculture? Helping reshape the future of farming processes, improve food safety and contribute to a better tomorrow? Then don't hesitate to write to us!

Your knowledge can make the world a better place. Let your skills and creativity contribute to the development of products which help secure and increase food production.

FULL STACK WEB DEVELOPER (F / M / D)

To increase our software team, we are currently looking for full stack web developers. You can be a part of an international software development team in a well-established and fast growing company in the field of IoT for Agriculture. Weiz (Austria) in the heart of Europe offers excellent and safe living conditions for families with lots of things to do outside of work.

It would be our pleasure to strengthen our R&D Team with what you have to offer as a software development team member.

WE OFFER:

- Relaxed dress code & work environment
- Hybrid work (in-office, home-office)
- International experience and contacts
- English is our working language
- Agile, autonomous and flexible teamwork
- Buddy Programme Training & Onboarding
- We support further education & certification
- Work on new web technologies together with experienced developers
- Fully equipped kitchen for breakfast & lunch time
- Performance-linked wages, in line with the industry standard
- Full time job: 38.5 hours/week
- 14 salaries and 5 paid weeks of holidays (including medical coverage and paid sick leave in compliance to state regulations)

WE EXPECT:

- Bachelors- or Masters degree in Computer Science or similar, or 5+ years relevant work experience
- Good written and spoken English
- Backend: Working experience with modern JavaScript, PHP or Go
- Frontend: Working experience with Angular and/or React, HTML, CSS, JSON, JavaScript (ES6)
- Preferably skills with RESTful web services
- Experience with version control SW such as Git
- Interest in algorithmic design and working with data series
- Cooperative development with focus on efficient and testable code

Send us your CV on jobs@metos.at.
